

FOR A BETTER FUTURE

CompactMOB, from the **MHS Group**, is an innovative furniture line that combines functionality, sustainability and intelligent design. We are more than a furniture brand; we are a new way of experiencing furniture. **CompactMOB** is the answer to modern challenges, offering products that respect the environment and respond to the needs of a consumer who values practicality and economy.

Imagine a piece of furniture that arrives at your home in a compact, disassembled form, ready to be assembled simply and intuitively, without the need for tools. Like a puzzle, involving you in the construction of your own space, with the satisfaction of seeing the product take shape, piece by piece. Assembly becomes part of the experience, where each fit becomes an expression of creativity and pleasure.

However, **CompactMOB's** unique assembly experience is not the most important thing. Each piece reflects a serious commitment to the future of our planet. Following European Community guidelines, our furniture is made from recyclable and recycled materials, respecting the Circular Economy, and our carbon footprint becomes greener with each new project. Our vision goes beyond functionality: we create intelligent solutions for a sustainable future.

Furthermore, we are **#ProudlyMadeInPortugal**.

Every stage of production is carefully thought out and maintained in Portugal, guaranteeing quality and attention to detail.

Each piece of **CompactMOB** furniture is unique, with different patterns and tones that celebrate the natural beauty of wood. These variations are the charm of the material, making each piece of furniture have its own personality and be perfect for your space. CompactMOB is the new generation of furniture: compact, sustainable, versatile and with a practical and elegant design. For those who value what is well made, what is innovative and, above all, what is environmentally responsible, **CompactMOB** is the right choice.

Choose **CompactMOB**. Choose quality. Choose sustainability. Choose Portugal.
