The background of the entire image is a dark, high-contrast wood grain texture. The grain lines are wavy and run diagonally from the bottom left towards the top right, creating a sense of depth and organic movement. The colors are various shades of dark grey and black, with some lighter, almost white, highlights that emphasize the texture of the wood.

# ribadao wood boutique

since 1976

Ribadao Wood Boutique, founded in 1976 in Portugal, is a leading name in the wood industry, renowned for producing high-quality flooring, being among the companies with the highest production capacity in Europe, approximately 2 millions m<sup>2</sup> per year.

Internationally recognized for the durability and excellence of our products, we are committed to sustainability, adopting responsible practices in forest management and production.

With a wide range of products, from traditional solid wood flooring to modern laminate solutions, our dedication to innovation and design is reflected in the creation of aesthetically appealing, functional, and environmentally sustainable products, perfectly suited to the most demanding projects.

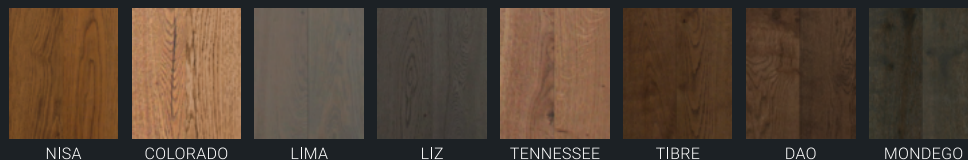

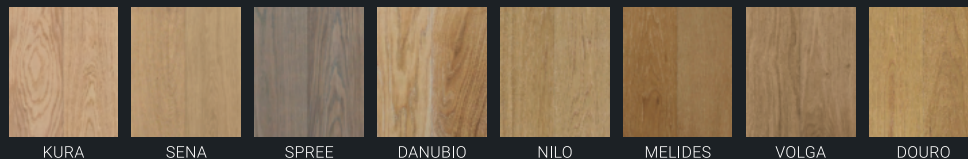

We take pride in offering truly exceptional customer service, providing specialized technical support, product selection guidance, and customized solutions to ensure the complete satisfaction and loyalty of our customers.

It is with honor that we hold a prominent position in the industry, recognized for quality, innovation, and exemplary service.

## OUR MAIN COLLECTIONS

### ENGINEERED WOOD FLOORING

Style and performance meet in the Rio Collection, a versatile line that combines different shades, grades and profiles. A noble wood like oak reveals its full potential through carefully selected gradations, capable of blending harmoniously into any interior design project.

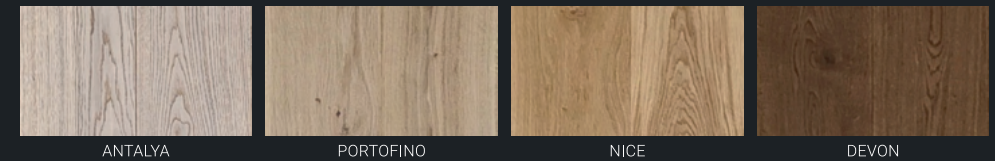

### ENGINEERED WOOD FLOORING

Inspired by Ribadão's history, the Mountain Collection was born out of a passion for wood and the relentless pursuit of flooring that combines rustic, timeless charm with the comfort of contemporary styles. Each piece reflects authenticity, tradition, and a natural beauty that spans generations.

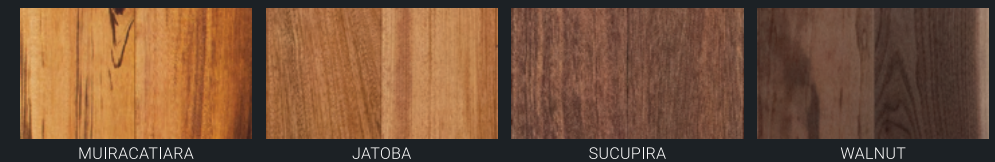

### ENGINEERED WOOD FLOORING

The Riviera Collection was designed to make life easier for those who design and build. With standardized dimensions, this line guarantees greater efficiency in transport, storage and installation, without compromising Ribadão's characteristic style and elegance.

### ENGINEERED WOOD FLOORING

Exotic Skins reveals the exuberance of nature in every detail. With species from South America and Africa, this collection displays unique patterns, complex textures and intense colors. Available in solid and multi-layer versions, it combines striking aesthetics with exceptional resistance. The perfect balance between durability and refinement.

### HARDWOOD FLOORING

Made from selected noble wood, the solid flooring reflects the authenticity, durability and timeless character of the natural material. The lightly brushed surface and matt finish highlight the natural grain and texture of each species. This collection is ideal for projects that demand nobility and material integrity.
