

# ARC

Quality Inspired Furniture

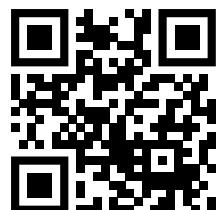

**ARC** is a family business now in its second and third generation, represented today by Armando Rocha, together with Rui and Inês Rocha. For over 50 years, we have been designing, producing and marketing furniture with an original and contemporary aesthetic, using eco-friendly materials and the refined know-how of our craftsmen.

True to our slogan Masters of Furniture, we combine tradition and modernity, preserving the values that define our identity while gaining recognition for quality, for the heritage we carry and for the bold design that sets us apart. This vision has driven successful collaborations with renowned designers and architects, both Portuguese and international.

We now invite you to enter our world of design. More than just furniture, our collection is made up of ideas, inspiration and the desire to create spaces that reflect how we want to live tomorrow. The new collection combines craftsmanship and innovation — timeless materials, striking details and a design language that tells stories of character and style.
